

Construction Update: Steveston Interchange Project

Traffic Implications for BC Hydro Utility Relocation

January 2023

Crews will relocate an existing BC Hydro electrical line north of the Steveston Interchange Project.

Starting January 16 and lasting for about a month, crews will install a new electrical line across Highway 99. This work includes installing new wooden electrical poles adjacent to Steveston Highway and Highway 99 ramps, connecting the new line to an existing line on both sides of Highway 99, and removing the existing poles and line.

Work will be completed during the day and at night. Overnight work is required to minimize traffic disruptions.

At two separate instances throughout this process, Highway 99 north and south will be closed to traffic for a short duration (less than 3 hours) at night. Traffic will be detoured up and over the existing on and off ramps. Short-term ramp stoppages will also occur at night to facilitate the line installation. Notices of these detours and impacts will be made available on [DriveBC](#) in advance. A sidewalk closure on Steveston Highway will also be in place for short

durations during construction, and detour routes will be provided.

A planned, short-term electrical outage is required to safely complete this work. BC Hydro will provide advance notice to affected residents and businesses. Access for emergency responders, residents and businesses will be maintained throughout construction.
