

Construction Update: Steveston Interchange Project

UPDATE: Traffic Impacts for Pier Piling

February 2024

Note: This notice was last updated February 22, 2024.

The northbound loop ramp on Steveston Highway and Highway 99 has been closed since November 16, 2023, to complete pier piling for the Steveston Interchange Project. This closure has been extended to the week of March 11.

Steveston Highway: There will be a full closure of the northbound loop onramp to Highway 99 for vehicles traveling eastbound on Steveston Highway until the week of March 11. Vehicles will instead enter Highway 99 by turning left from Steveston Highway onto the existing northbound on-ramp. The intersection will be temporarily upgraded to accommodate two left-turning lanes during the closure. Motorists are encouraged to consider alternative routes. Some interruptions and brief delays may occur for transit users.

Highway 99: There will be a full closure of the southbound bus-only lane on Highway 99 from January 26 to March 31. Buses will reroute via the southbound off-ramp and will maintain service to the Highway 99 southbound transit stop via the transit-only on-ramp.

Pier piling will only take place during the day. Nearby residents and pedestrians will hear noise and feel vibrations in the immediate area where work is taking place. For added safety, there will be intermittent stoppages for pedestrians crossing the Steveston Highway overpass sidewalk.

We understand that this work may be disruptive, and we appreciate your patience while we build the new Steveston Interchange. If you have questions, please email StevestonProject@flatironcorp.com or call the construction information phone line (24/7) at **1-888-270-1075**.
