

## Steveston Interchange Project

### Western Intersection Work

June 2025

**Beginning as early as June 11**, crews will be working on the south side of Steveston Highway, just west of the Highway 99 on-ramp, to widen a 100-metre section of both the road and sidewalk.

**Work is scheduled to last for approximately one month, during daytime and nighttime hours.**

Pedestrians will be directed to make a minor detour while sidewalk construction is underway. Plastic matting will be used to form a temporary walkway adjacent to the existing one.

The eastbound curb lane will be closed to vehicle traffic, which may cause minor congestion.

Access to the Highway 99 southbound on-ramp will remain open, and there will be no impact to transit users.

The new five-lane Steveston Interchange Project is a key part of the Highway 99 Tunnel Program to improve travel along the Highway 99 corridor. As part of the broader Program, the interchange will integrate seamlessly with the new eight-lane, immersed tube tunnel being built under the Fraser River to replace the George Massey Tunnel.

If you have any questions about construction, please email [StevestonProject@flatironcorp.com](mailto:StevestonProject@flatironcorp.com) or call the construction information phone line (24/7) at 1-888-270-1075.

*See Page 2 for more details.*
