

Fraser River Tunnel Project

Early Construction Works Progressing

May 2026

Early construction works for the new toll-free, eight-lane tunnel to replace the existing George Massey Tunnel are progressing. Starting as early as May 2026 and continuing through the summer, several key activities will occur. Some activities will have impacts such as noise and vibration, overnight lane reductions, and temporary trail closures. Early construction activities include:

- Utility works and relocations
- Creating construction vehicle access roads
- Site development and casting basin construction
- Instrumentation and monitoring installation
- Acoustic barrier installation
- Ground improvements

Additional details for each of the activities noted above may be communicated in advance through further notifications, posters in affected areas, traffic media, and alerts on DriveBC.ca. Please watch for signage indicating when closures and detours will be in place.

What to Expect

	<p>Timing > Starting as early as May 2026 and continuing through the summer</p>		<p>Hours of Work > Day and night, with noisier activities scheduled during the day</p>
	<p>Traffic > Watch for signage</p>		<p>Impacts/Interruptions > Drivers may experience minor delays > Park users, nearby businesses, and residents may experience intermittent noise and vibration > During overnight works, lights will be directed towards the worksite</p>

Please check DriveBC for the most up-to-date traffic information.
